Special Assignment

Cattle Viewing

Bulls will be at the barn for viewing Wednesday evening through sale day, or come any day before to the ranch to see the bulls.

Delivery

We will keep the bulls free of charge until they are semen tested about the end of April. The bulls will then be delivered free of charge. In some cases we would request that you meet us at a suitable place for both parties. We'll take \$100 off if the buyer hauls his bulls home on either sale day or the following day.

Guarantee

All bulls sell as guaranteed breeders. The yearling bulls have not been semen tested due to their young age. We suggest you have them semen tested before you use them. All claims of non-breeders must be made within six months of purchase. We cannot guarantee against physical injury or illness, but would like you to let us know if you have any problems.

Brenner Angus

Brenner Angus would like to welcome everyone to our 2025 annual bull sale. We would like to thank our family, friends and customers for your continued support in our program. The bulls in this year's sale represent over 50 years of breeding registered Angus cattle. We are in a time of high optimism with record-high cattle prices. It is a good time to invest in great genetics to take advantage of the prices and reap returns.

For years, we have been striving to produce problem-free cattle that require low inputs, are productive, and have the performance to add pounds in the pasture and into the feedlot. The registered cow herd is run the same way as a commercial cow herd and given no second chances. Mainly calving out on pasture. They need to have strong maternal traits, calve easy, possess strong mothering ability, and great udders are a must. Easy fleshing, fertile cows that breed back, weaning calves come fall are cows that help your bottom line. The bulls in our sale are backed by females as such. A good bull is produced from a great cow.

The yearling bulls (53 Angus and 14 Red Angus) came off of very dry summer grass and were weaned the first week of October. They have been on a growing/developing ration. They have been gaining an average of 3.25 lbs. per day. We don't overfeed them so they can go out and perform in the real world. Working in different environments while maintaining their condition and longevity. This year's offering consists of many performance bulls that will go out and add pounds to a calf crop and do well. Once again, we are offering many calving-ease bulls that will work great on heifers or cows without giving up performance. They are noted in the comments.

All the bulls in the sale are registered. If you want papers transferred to you, please let them know in the office after making your purchase. We will need your correct address and your member number if you have one.

Once again, we would like to thank all our customers for your support. We invite you to join us on Friday, February 28th, 2025, @ 2:00 PM CST at Kist Livestock in Mandan, ND. A complimentary lunch will be served before the sale. The bulls are always open to visitors before the sale at the ranch south of Carson. If you have any questions don't hesitate to call us. We look forward to seeing you at the sale!

God's blessings to you and your families throughout the coming year!

The Brenners and the Werners

Watch & Bid online for FREE!

DVAuction
Broadcasting Real-Time Auctions

**Visit www.dvauction.com
and Register!**

It's as easy as 1, 2, 3 ...

1. Create an account at www.dvauction.com under the "create new account" tab.
2. Apply for bidding by clicking "apply for bidding" in the upper left corner of your screen, at least 24 hours prior to the auction.
3. Tune into the sale and make your purchases!

Can't make the sale?

Let DVAuction bring the sale to you!

Busy during the sale?

Let DVAuction represent your bid!

For general questions,
please contact our office:

(402) 316-5460 or support@dvauction.com

RED ANGUS GUIDE TO EPDS

RedAngus.org

ProS..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
