All bulls were weaned on 10/24/2025 and yearling weights were taken on 2/28/2026. All the bulls were vaccinated in the spring and had two rounds in the fall of Vision 7 Somnus, Bovi-shield Gold One Shot, and Dectomax Injectable. They were recently poured, dewormed, and given Fusoguard at semen testing.

The bulls have been on a high roughage TMR and our cattle are also on a strict mineral program. We guarantee our bulls to be sound, fertile, and reproductive through the first breeding season. In the event that the bull is injured or fails a semen test, we can offer a replacement or full refund. We will guarantee your satisfaction! We look forward to expanding and continuing to provide performing quality cattle and structurally sound breeding stock. Thank you to everyone who shows interest in our program! Shelby -
